Sales & Profit Analysis Dashboard

1. Introduction

This project focuses on analyzing sales and profit performance using Power BI. The dashboard provides insights into overall sales, target comparison, and category-wise performance.

2. Objectives

- To track total sales and profit
  - To compare sales with target
  - To analyze monthly sales trends
  - To identify top-performing categories

3. Tools Used

Power BI

4. Dashboard Description

The dashboard consists of:

- KPI Cards showing Total Sales, Target, and Achievement %
- Line Chart representing Sales Trend over time
- Bar Chart showing Category-wise Sales

5. Key Insights

- Sales performance is below target
- Certain categories perform better than others
- Monthly trend shows fluctuations in sales

7. Dashboard Preview

KPI (Key Performance Indicator)

Sales vs Target

The total sales achieved is 4.36K, while the target is 100K.

This shows that sales are significantly below the target, achieving only 4.36%.

Hence, the business performance is under target.
